Dear Recipient Name:

To get started right away, just click any placeholder text (such as this) and start typing to replace it with your own.

Want to insert a picture from your files or add a shape, text box, or table? You got it! On the Insert tab of the ribbon, just click the option you need.

Find even more easy-to-use tools on the Insert tab, such as to add a hyperlink, insert a comment, or add automatic page numbering.

Sincerely,

Xbudi

A `url(…)` or a comma separated list `url(…)`, `url(…)`, …, pointing to an image file. More than one `<url>` may be provided as fallbacks, in case some cursor image types are not supported. A non-URL fallback (one or more of the keyword values) *must* be at the end of the fallback list. See Using URL values for the cursor property for more details.
